BALAMURUGAN B

CHENNAI, INDIA 600096 | 8667293029 | balamuthu86672@gmail.com | **WWW:** About Me

Summary

Results-oriented QA Engineer with over 3.5 years of experience in automation testing, performance engineering, manual testing, and quality assurance. Specialized in building robust frameworks using Python, Selenium, and Pytest, with over 2,500 automated test cases deployed. Proven track record of reducing test cycle time by 90% and enhancing system throughput by 40%.

Skills

- Python
- Selenium WebDriver and Pytest
- SQL
- Oops
- Linux
- API and manual testing
- Performance testing
- Apache Bench (AB) and JMeter
- Jenkins and Git
- Docker and AWS services

Experience

Associate Tester Jul 2021 to Feb 2025
Odyssey Technologies Limited — Chennai, India
(Started as a Junior Tester, promoted to Associate Tester in January 2023.)

- Developed and maintained a Selenium and Pytest automation framework covering over 2,500 test cases, achieving 99% test coverage.
- Reduced API testing time from days to hours using Python requests and Postman automation.
- Improved application performance by 40% TPS via caching and optimization of SSL-layer bottlenecks (Apache Bench, JMeter).
- Mentored two junior QA engineers, standardizing practices for test design and automation.
- Performed SQL-based validations to ensure backend data accuracy.
- Executed functional, regression, sanity, and integration testing across platforms.
- Automated routine performance tests using Python and shell scripts, improving team efficiency by 60%.
- Utilized CI/CD pipelines with Jenkins, Git, and Docker for continuous delivery.
- Utilized AWS services such as IAM, EC2, S3, ELB, and ASG.

Education and Training

Bachelor of Engineering, Electronics And Communications Engineering Apr 2021
St.Joseph's College of Engineering — Chennai

Core Competencies

- **Test strategy and design** – full-stack test planning for web applications
- **Automation frameworks** – scalable, maintainable, and reusable test architectures
- **Performance engineering** – identifying and resolving system performance issues
- **Cross-functional collaboration** – effective teamwork with developers and product teams
- **Quality leadership** – mentorship, process improvement, and automation standardization
